

# Covid detections state-by-state

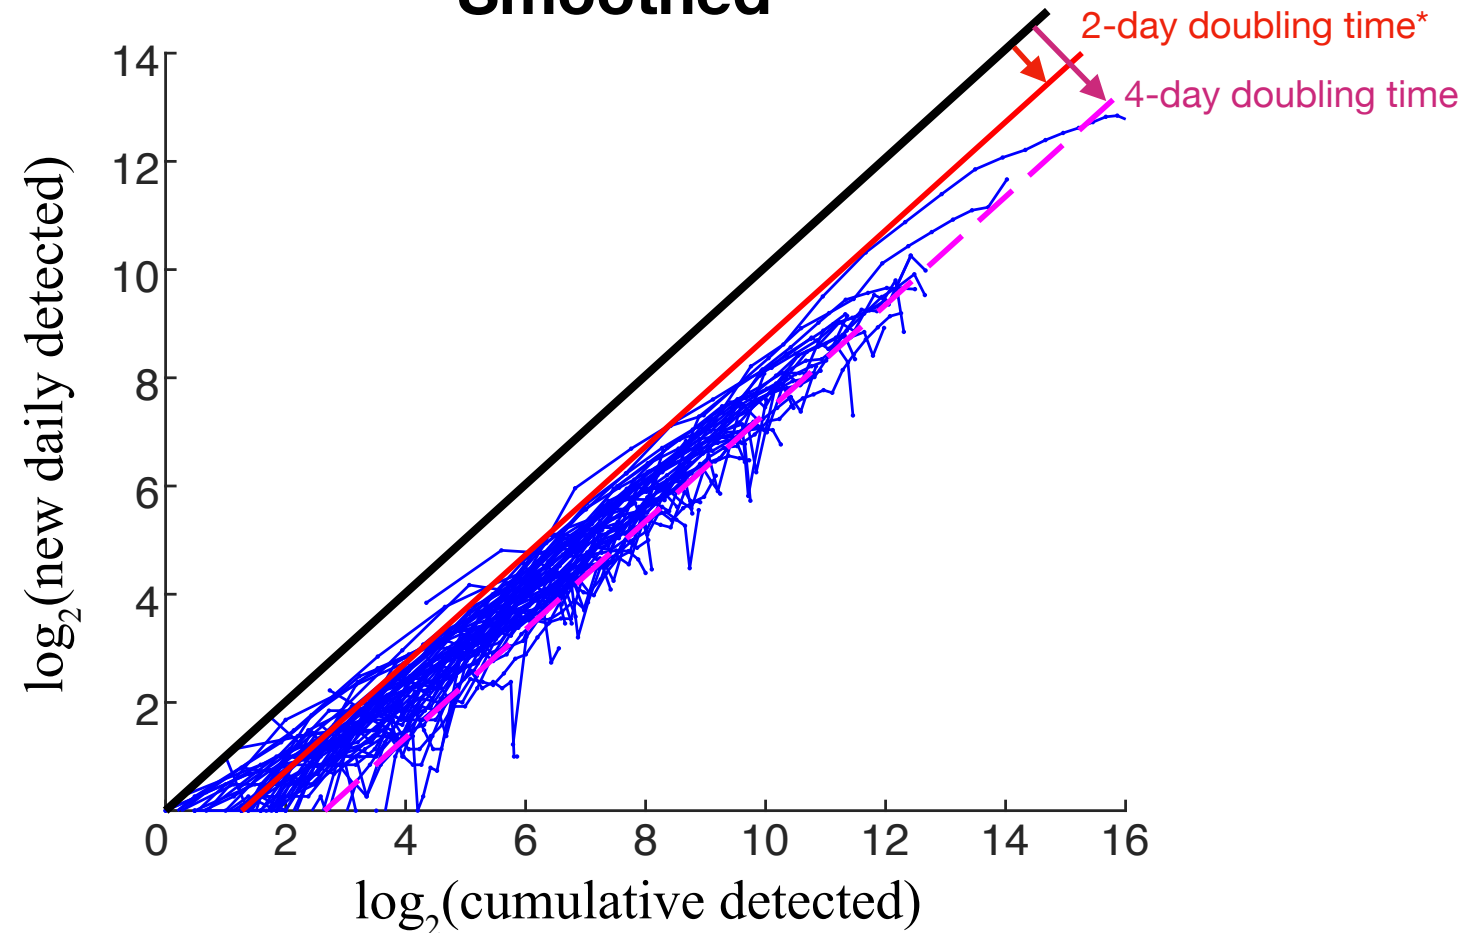

Data as of 3-30-2020  
(data source: covid tracking project)  
Dan Butts

# OVERALL (all 56 states in database)

## Raw data

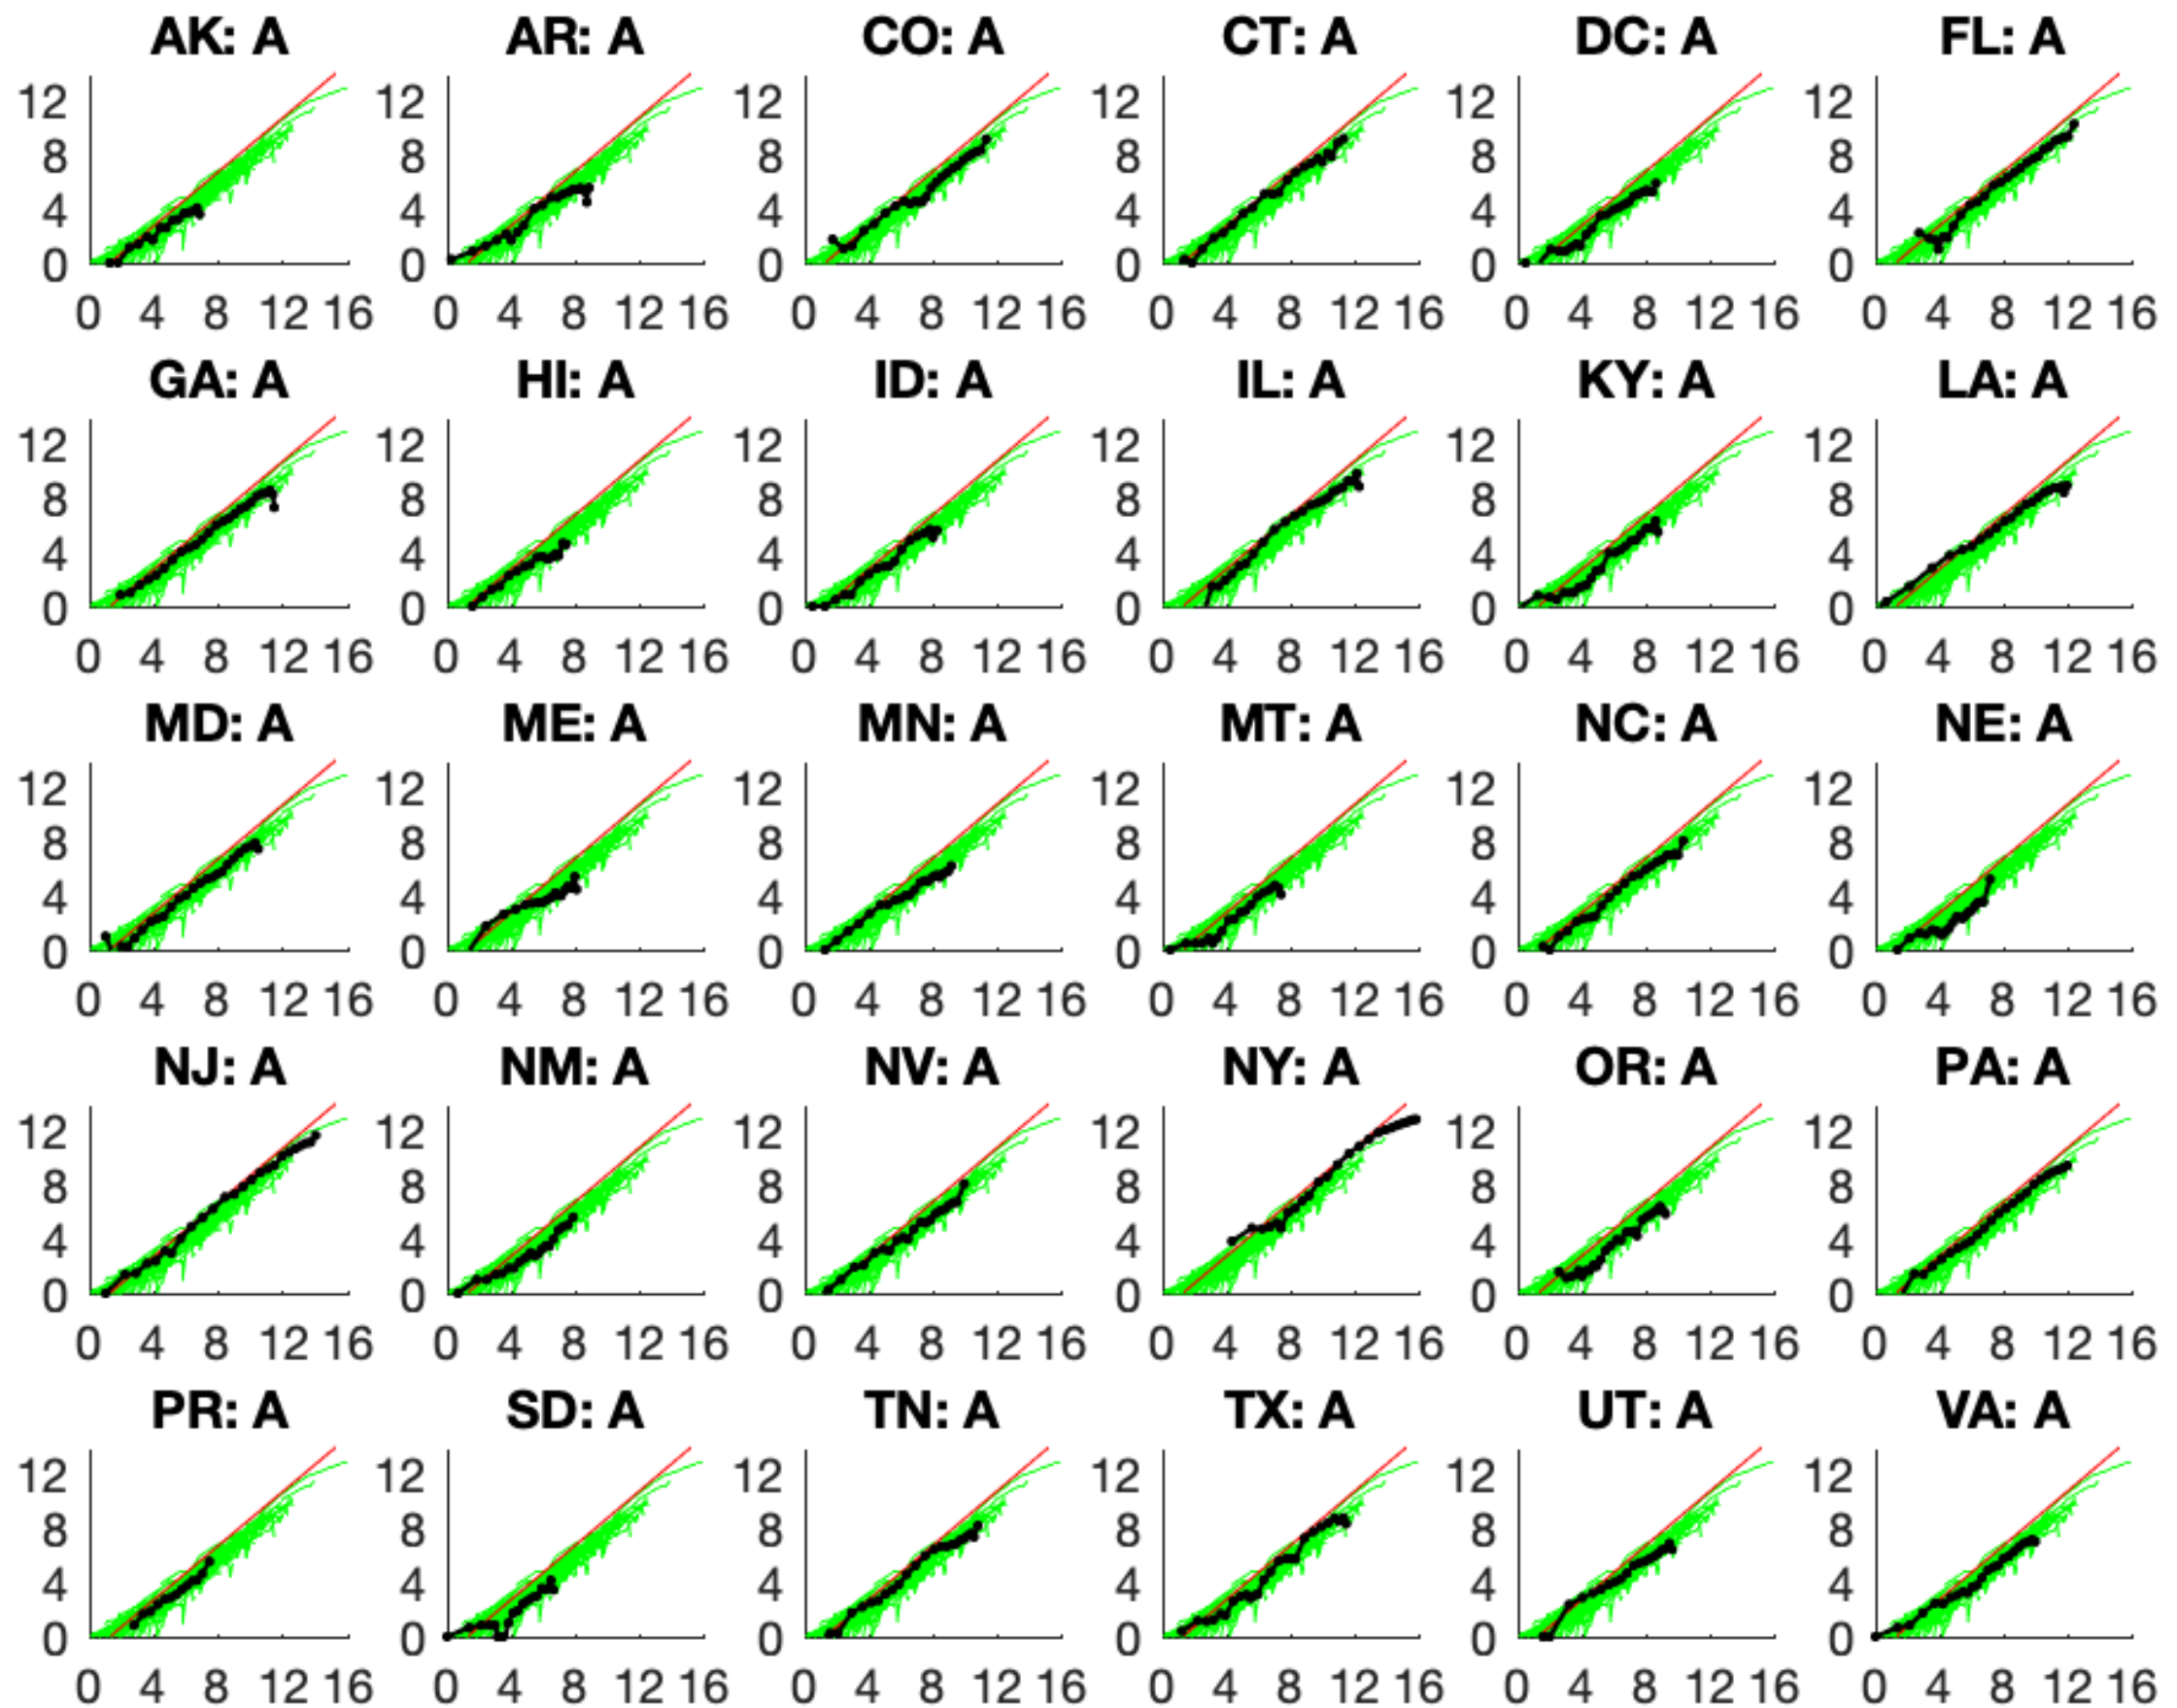

## Smoothed\*\*

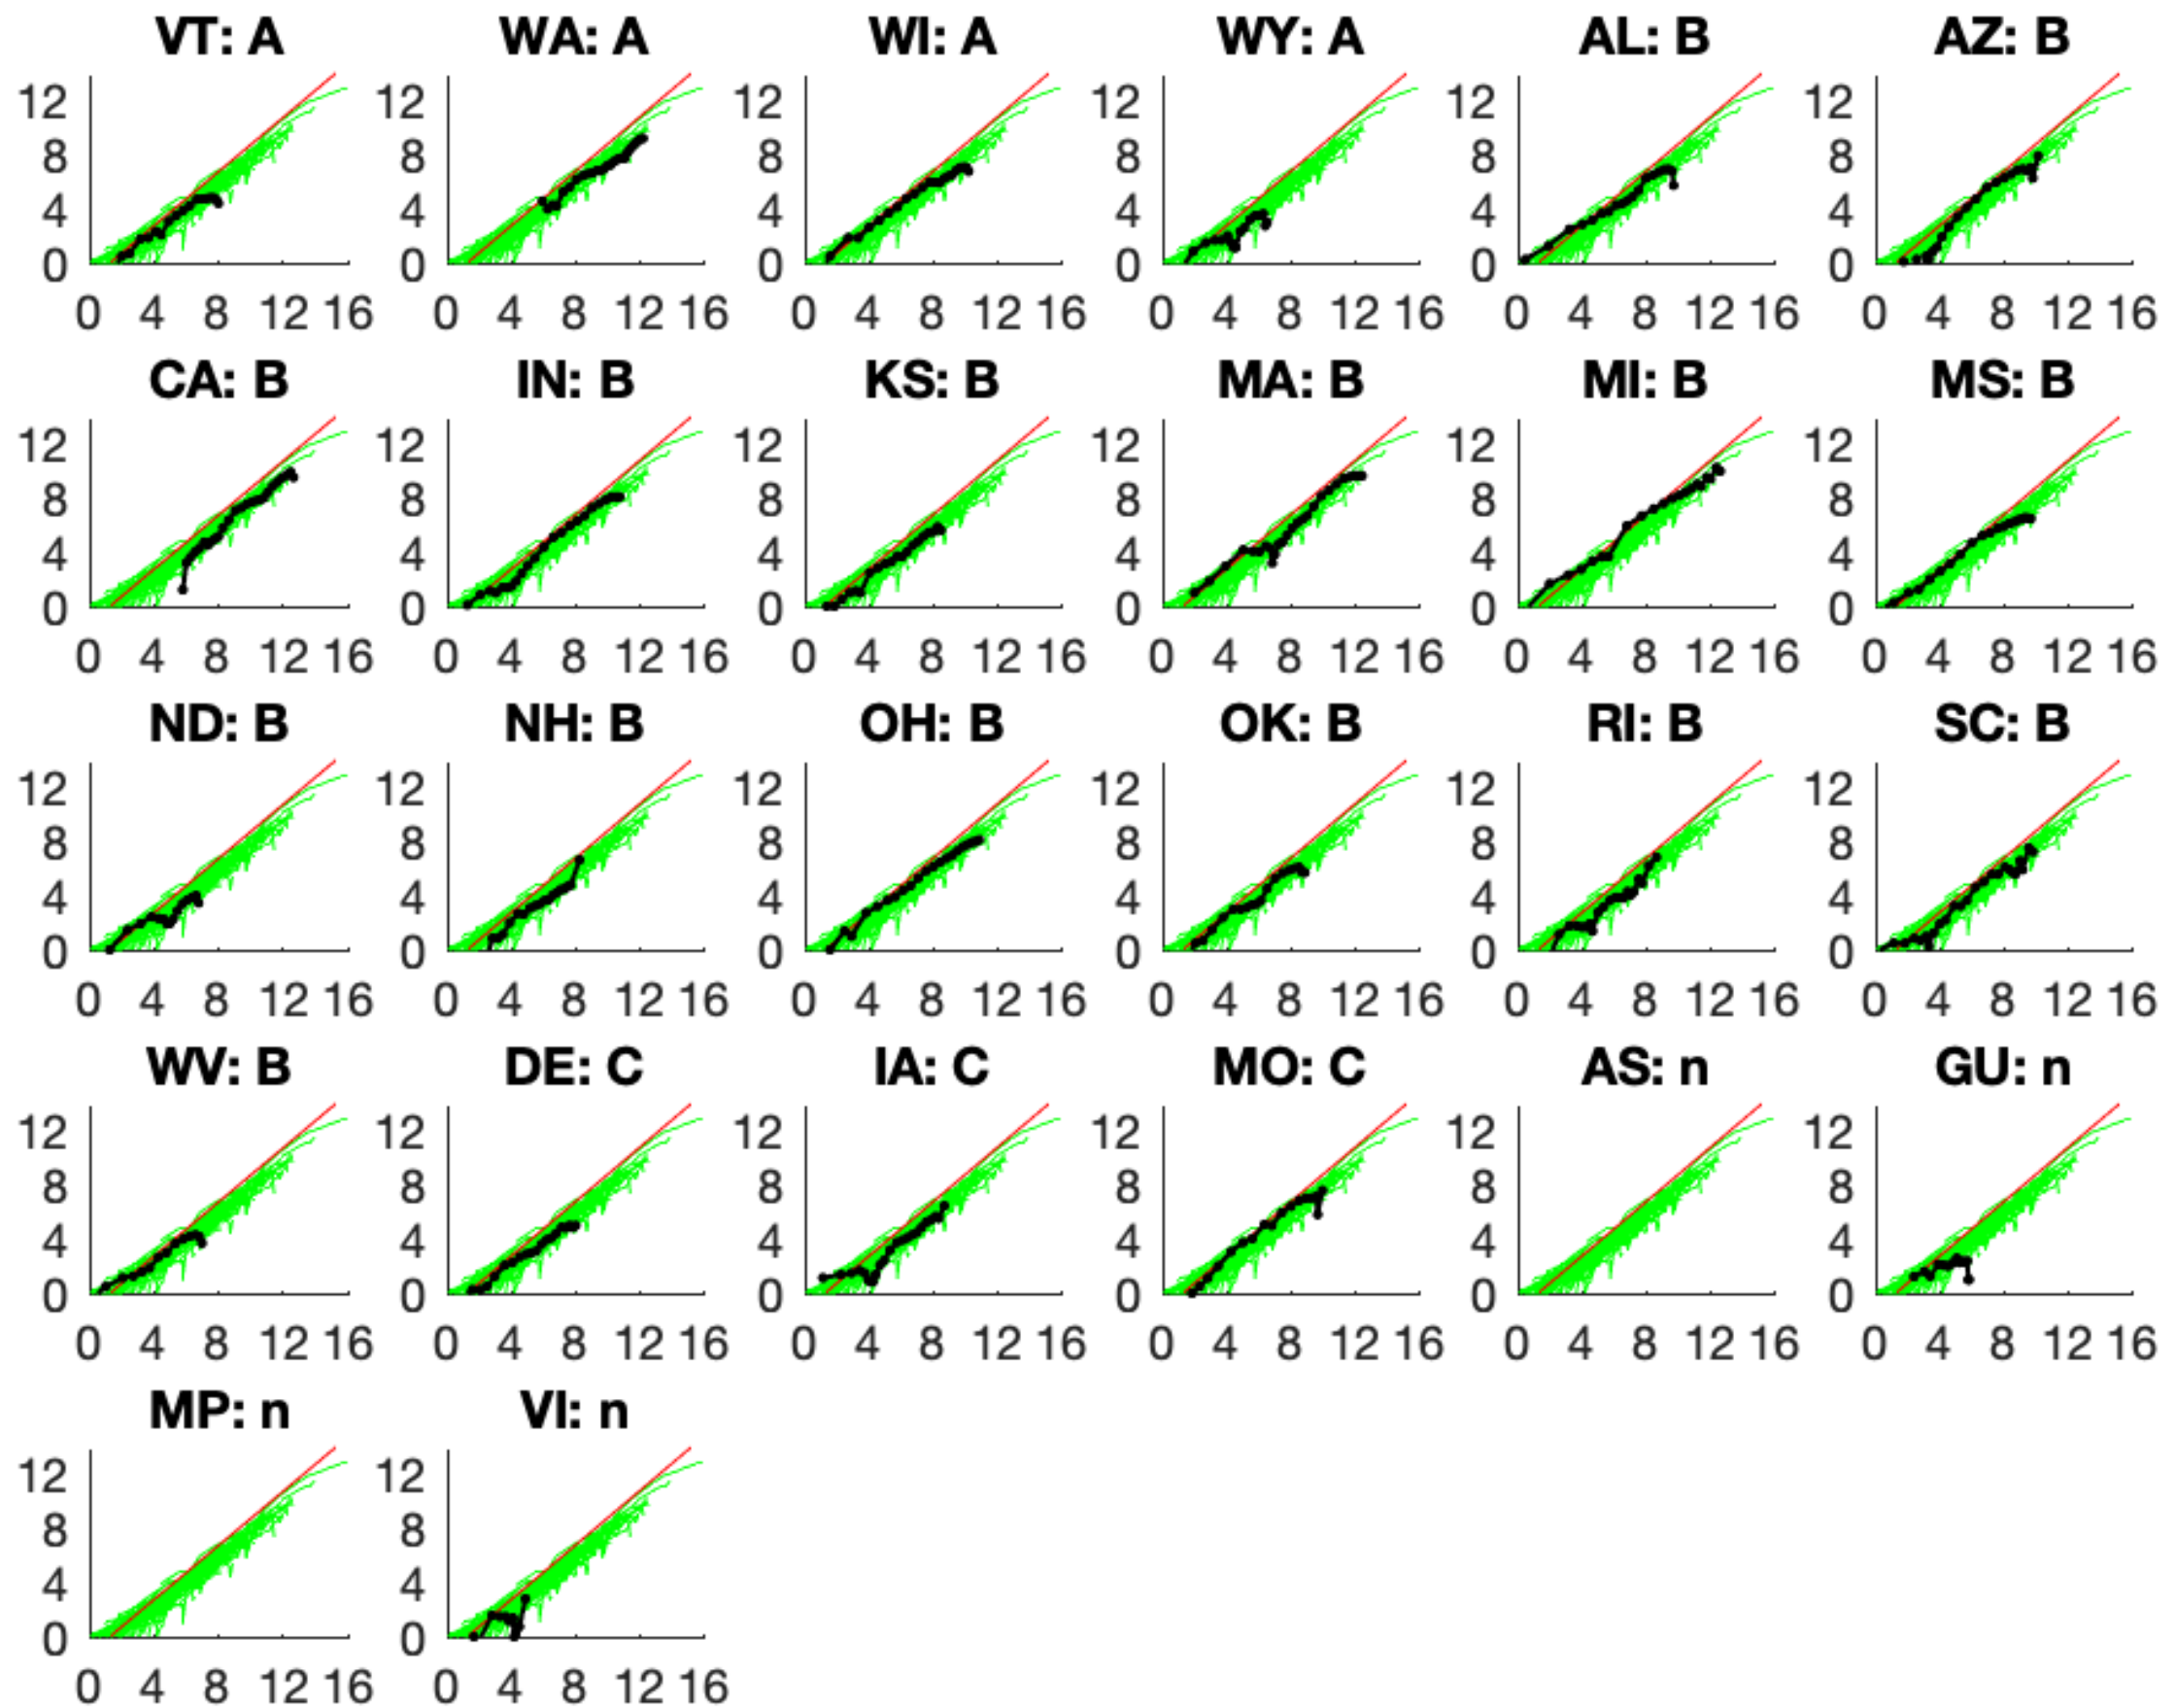

$4 = \log_2(16)$   
 $10 = \log_2(1,024)$   
 $16 = \log_2(65,536)$

\*\*cumulative counts represent 5-day average

\*Doubling time estimated as shift along vertical axis by:  
 $\log_2 \left( 1 - 2^{-1/\tau} \right)$

[red line shows estimate of 2-day doubling time]

[red line shows estimate of 2-day doubling time]
